

Weekly Progress Report			
Topic:	Chatbot – Final Project	Week No.	14
Course Code:	CSST101, CSST102	Term:	1st Semester
Course Title:	Advance Representation and Reasoning Basic Machine Learning	Academic Year:	2024-2025

Main Tasks Assigned:

Optimize model based on Week 3 results
Improve data augmentation and preprocessing techniques
Continue model training and monitor validation performance

Work Completed:

Researching for the best suited structure for the model's needs.

Challenges Encountered:

Difficulty in choosing a structure and style for our model to use.

Solutions Implemented:

Study more about the different ways to build a chatbot and chooses one that'll fit us best.

Tasks for Next Week:

Implement chosen plan for the model.

Instructor's Feedback:
